Projects

◆ COVID-19 Tracker Dashboard

ReactJs CSS

Live COVID19 Tracker

Data being fetched by APIs

DropDown filter for Country wise report (Inprogress)

Date filter for Specific date cases (Inprogress).

◆ Portfolio

HTMLCSS

Responsive portfolio of mine

◆ ToDoList with React

React CSS is used

You can add/delete/edit your items in ToDoList.

It uses local storage to store all the data in the list.

There is a button labeled CheckList by clicking it deletes all the data in the list.

Achievements

Got a scholarship in the second year of my graduation.

Harsh Raj

Aspiring Web and mobile application Developer
